

The ALI AB Global Strategy 60/40 GBP Fund

This factsheet has been produced to provide you with fund information only and is not designed to provide advice on the suitability of an investment for your personal financial situation. The ALI AB Global Strategy 60/40 GBP Fund (the "Fund") is a mirror fund which means it invests wholly in the AB Global Strategy 60/40 GBP Fund (the "Underlying Fund").

Fund Objective

The Fund seeks to achieve the highest total return consistent with what the investment manager determines to be a reasonable level of risk, given the Fund's target asset allocation and taking into account the financial market conditions.

This Fund is designed for investors who seek capital growth and are willing to accept the increased risks associated with the highest exposure to equity markets available with Secure Advantage+.

UK investors who purchase a product from the AXA Life Invest Secure Advantage+ product range can get exposure to the performance of the Underlying Fund by investing in the Fund. The Fund is a unit-linked fund and the value of the Units in the Fund is calculated by reference to the value of the Underlying Fund. If you have any questions regarding the contents of this factsheet, please speak to a financial adviser.

ASSET ALLOCATION

As at month end the portfolio was partially invested due to derisking. Low Duration corresponds to the proportion of the Funds allocated to short-term assets in application of the volatility management mechanism.

Due to rounding, figures may not total 100%.

UNDERLYING FUND MANAGER COMMENTARY

Global equities rose, as investor sentiment was supported in the month by continued monetary and fiscal stimulus. Fixed-income assets rallied in July, extending gains for the fourth month in a row.

During the month, equity components were negative, except for the positive Emerging-Markets and US components. Fixed-income components were also negative, except for the positive Global Credit component. Within currencies, the British pound had positive performance relative to most other major currencies. It strengthened against the US dollar, Taiwan dollar, South Korean won, Canadian dollar, Singapore dollar and South African rand. It was down against the Swedish krona and Norwegian krone.

Volatility Management

The volatility cap of the fund is 8.0%. Markets continued to rebound through July, sending volatility even lower, and continuing the trend from May and June. The fund also experienced lower volatility for the month though realized volatility that continued to exceed the volatility cap. The fund was 75% invested in the risky assets at July month end.

RISKS OF INVESTING

Before investing, it is important to understand any potential risks to your investment. Please speak to your Financial Adviser to understand the risks that your investment may face as a result of your exposure to this Fund.

The value of investments and any income from them can go down as well as up and is not guaranteed. This may be due to market fluctuations or changes in exchange rates, or other factors. This means that investors may not get back the original amount invested. Where a Fund invests in shares or other assets which are designated in a different currency to the Fund, or where the Underlying Fund is denominated in a different currency, prices may rise and fall purely as a result of exchange rate fluctuations. Past performance is not a reliable guide to future performance.
